

SURENDER REDDY

Hyderabad, India | +91-9381615982 | surender.varakantham@gmail.com | [linkedin.com/in/surender](https://www.linkedin.com/in/surender)

PROFESSIONAL SUMMARY

Results-driven Data Analyst around 5+ years of experience transforming raw business data into actionable insights through robust data models, optimized DAX measures, and interactive Power BI dashboards. Adept at end-to-end BI delivery — from requirement gathering and data modeling to deployment, security, and scheduled refresh — across retail, banking, and energy domains. Recognized for translating complex business requirements into clear, decision-ready reporting solutions, and for collaborating effectively with cross-functional stakeholders to drive data-driven decision-making.

TECHNICAL SKILLS

Power BI: Data Modeling, Relationships, Power Query, Bookmarks, Slicers, Drill-Through, Custom Visuals, Row-Level Security (RLS)

DAX: Calculated Columns, Measures, Text/Aggregate/Iteration/Time Intelligence/Mathematical Functions

Data Visualization: Line, Stacked & Clustered Charts, Matrix, Table, KPI Scorecards, Heat Maps, Ribbon & Pie Charts

SQL Server: T-SQL, CTEs, Joins, Stored Procedures, Views, Indexes, User-Defined Functions, Temp Tables, Cursors

BI Operations: On-Premise Data Gateway, Scheduled Dataset Refresh, Workspace Publishing

Data Sources: SQL Server, Excel, SharePoint, CSV/Text Files

Tools & Languages: SSIS, Python (Pandas, NumPy), Advanced Excel (Pivot Tables, VLOOKUP, Power Query), DAX Studio, Performance Analyzer

PROFESSIONAL EXPERIENCE

Data Analyst — Axiora Global Solutions

Feb 2023 – Present

- Utilized Excel tools such as Pivot Tables, Power Query, and Lookups to clean and transform raw datasets, improving reporting efficiency by reducing manual cleaning effort and enhancing data accuracy.
- Built optimized SQL queries to extract, join, filter, and validate data from relational databases, enabling faster and more reliable access to operational and business insights.
- Developed interactive Power BI dashboards using KPIs, slicers, charts, and custom DAX measures, helping stakeholders visualize trends and make data-driven decisions.
- Automated reporting workflows using Python (Pandas, NumPy) to streamline data preparation, reducing manual processing time and improving consistency of recurring reports.
- Collaborated with cross-functional teams to gather business requirements, translate them into analytical solutions, and deliver actionable insights that improved operational efficiency and decision-making.
- Performed data quality checks, reconciliation, and validation across multiple data sources to ensure data accuracy, consistency, and compliance with business standards before reporting.
- Optimized Power BI data models by implementing star schema design, relationships, calculated columns, and performance-tuned DAX measures, resulting in faster dashboard refresh times and an improved user experience.

Consultant — Capgemini Technology Services

Jan 2022 – Jan 2023

- Gathered requirements directly from the client and built data models from multiple sources, including flat files and databases.
- Extracted data from SQL Server and the Group Data Warehouse (GDW) to produce daily, weekly, monthly, and quarterly reports.
- Created interactive timeline slicers and optimized data models using Performance Analyzer and DAX Studio.
- Managed deployment, scheduling, and monitoring of dataset refreshes across multiple on-premise gateways and clusters.
- Merged survey data from approximately 64 countries/markets across varied formats into a single consolidated dataset.
- Performed data cleansing and validation against defined business specifications, and implemented segmentation logic in Excel.
- Developed monthly, quarterly, and trend reports in Power BI using charts, slicers, filters, KPI scorecards.

Assistant Manager — Kotak Mahindra Bank

Dec 2019 – Sep 2021

- Coordinated corporate salary account acquisition and onboarding, liaising between corporate clients, internal sales teams, and operations.
- Maintained and tracked MIS reports in Excel to monitor sales pipeline, account activations, and team performance against monthly targets.
- Acted as a single point of contact for corporate clients, resolving account-related queries and coordinating with internal teams.

Supervisor — Data Link Consultancy

Jan 2016 – Aug 2019

- Supervised day-to-day banking process operations on-site at Axis Bank as part of a third-party vendor team, ensuring accuracy and timely turnaround.
- Received and managed loan documents from Axis Bank, supervising barcode-based scanning and category-wise indexing prior to digitization.
- Coordinated upload of scanned documents to the Axis Bank document portal, enabling the bank team to access and review records digitally.

PROJECTS

Data Quality Dashboard — Power BI

May 2024 to Jun 2026

- Built a Power BI dashboard to monitor data quality across key business datasets, tracking completeness, accuracy, duplication, and consistency.
- Used Power Query to profile and cleanse incoming data, flagging missing values, format mismatches, and duplicate records.
- Designed DAX measures and conditional formatting to highlight data quality issues, reducing time spent on manual audits.

Sales Performance Dashboard — Power BI

Feb 2023 to Apr 2024

- Developed an interactive Power BI dashboard to track sales performance across regions, products, and time periods using KPIs and trend visuals.
- Built DAX measures for revenue growth, target vs. achievement, and period-over-period comparisons to support sales review meetings.
- Implemented slicers and drill-through pages, replacing static Excel reports with a live, refreshable dashboard.

EDUCATION

B.Sc. Computer Science — Osmania University
